

Care & Maintenance Instructions

Cleaning Guidelines

Avoid rain, adverse weather conditions, and car washes for 72 hours after installation.

Substances such as tree sap, bird droppings, salt spray, insects, tar, oils, etc. should be cleaned immediately to preserve the life of the film.

NEXT 72 HOURS

RAIN & ADVERSE WEATHER

CAR WASHES

Cleaning Materials

Use a clean microfiber cloth (to prevent scratching of the film) in conjunction with ammonia-free glass cleaner or a mild solution of dish soap and water.

MICROFIBER CLOTH

AMMONIA-FREE GLASS CLEANER

OR

DISH SOAP & WATER

Avoiding Product Damage

Avoid sharp objects and direct high-pressure water. Do NOT use hard brushes or harsh chemicals.

SHARP OBJECTS

HIGH-PRESSURE WATER

HARD BRUSHES

HARSH CHEMICALS

Proper Wiper Care

The use of dry windshield wipers (without the presence of precipitation or windshield washer fluid) can damage or scratch the film.

Consider replacing your wipers if you see this on your windshield.

STREAKING

CHATTERING

SMEARING

SPLIT RUBBER

SQUEAKING

Important Information

- Please contact the vehicle manufacturer to verify that the addition of windshield protection film does not interfere with any ADAS or onboard systems such as anti-collision, lane departure, auto pilot, and others.
- Please check and adhere to all local, state, and federal laws regarding the legality of windshield protection film installation.
- Windshield protection film is temporary in nature and clarity will diminish over time. Remove the film as soon as visibility is compromised.

Frequently Asked Questions

Q: Is Super Stretch self-healing and hydrophobic?

A: Yes and yes!

Q: What is the warranty for Super Stretch?

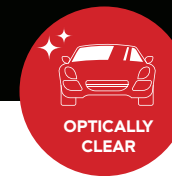

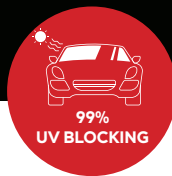

A: There is a one (1) year manufacturer's warranty that covers against yellowing, bubbling, or cracking. It does not cover against damage caused by misuse, installation issues, accidents, misapplication, normal wear and tear, road debris impact, collisions, wiper use, and/or intentional damage of any kind.

Visit www.windshieldskin.com/pages/register to register your product warranty. Please see warranty for specific terms and conditions.

Super Stretch**

Product Overview

Windshield Skin® Super Stretch is an optically clear film that is installed on a windshield to help protect it from cracking or breaking from road debris, saving you the hassle and inconvenience of windshield replacement.

Windshield damage happens to so many people that windshield replacement is a billion dollar a year industry in the US. But the truth is that it is an expense and inconvenience to replace a windshield.

First, most replacement windshields are not the same quality glass that was originally installed by your car's manufacturer.

Second, many replacement windshields are prone to leaking due to improper installation.

Third, after replacement, your vehicle will most likely incur the expense of recalibration.

Finally, once your car's original windshield is replaced, the structural integrity of the car's original factory seal may be compromised.

Technical Specifications

Material Construction	Urethane
Total Thickness at Time of Installation	8 mils
Visible Light Transmittance (VLT)	96%
Impact Resistance Versus Glass	8X
Peel Strength - Test Method ASTM D-902-98	0.2%-0.5% Delta Haze
Infrared Surface Blockers	15%-20%
Glare Reduction	4%-7%
Pencil Hardness per Layer	Yes – Exterior Weather Treatment
Average Life Expectancy	1-5 Years with proper care and maintenance
Manufacturer's Warranty	1 Year

Impact-Resistant

Helps to prevent windshield cracking from minor impact (rocks, pebbles, and other road hazards).

Scratch-Resistant

Windshield Skin can withstand normal wear and tear but will need to be replaced regularly to maintain ultimate visibility.

Optically Clear

Windshield Skin is optically clear like the windshield on which it is installed.

All windshield films are temporary protection that will need to be replaced periodically. That is because the film is installed on the outside and is subject to various weather conditions as well as windshield wiper usage.
