FX-PM Series

3M™ Automotive Window Film FX-PM Series

Economical alternative

The 3M™ FX-PM Series offers strong heat rejection, low reflectivity and powerful UV protection at a price that works for you.

Reduce glare

The FX-PM Series reduces up to 93% of the glare from blinding sunlight, allowing you to see better and concentrate more on driving.

Protect your privacy

Increase privacy for you and your valuables with the FX-PM Series, available in tint levels that can block up to 95% of visible light into your vehicle.

Stay cool

The FX-PM Series incorporates a unique process that allows for strong heat rejection, low reflectivity and protection from ultraviolet (UV) rays. It rejects up to 59% of the total solar energy coming through your windows.

Stay connected

The FX-PM Series is a non-metallized window film that won't interfere with mobile devices, GPS or satellite radio reception.

Limited lifetime warranty: Backed by one of the most comprehensive warranties you can get. Sold and installed by professional 3M Authorized Dealers Installers, our films are durable, long-lasting and virtually maintenance free.

Terms to Know

- TSER – Total Solar Energy Rejection**
 The percentage of total solar energy rejected by filmed glass. The higher this value, the less solar heat is transmitted.
- VLT – Visible Light Transmitted**
 The percentage of visible light that passes directly through filmed glass: the higher the number, the lighter the film.
- Ultraviolet Rejection**
 The percentage of ultraviolet (UV) light that is rejected by the filmed glass. UV light contributes to the fading and deterioration of fabrics and leather.
- IRR – Infrared Rejection**
 The percentage of solar infrared energy rejection over the wavelength range from 900-1,000 nm. Infrared rays are primarily responsible for the heat you feel when driving.
- IRER – Infrared Energy Rejection**
 The percent of solar infrared energy rejection over the wavelength range from 780–2,500 nm. IRER takes into account the transmitted and absorbed IR energy that will be reradiated into a car.
- Glare Reduction**
 The percentage by which visible light is reduced by the addition of film.

Choose your level of protection.

The FX-PM Series is available in a variety of tint levels to meet your needs.

	FXPM 5	FXPM 15	FXPM 25	FXPM 30	FXPM 35	FXPM 40	FXPM 55
IRR* TSER							
Total Solar Energy Rejected	59%	58%	56%	55%	53%	52%	49%

UV Rejection	99.0%	98.0%	98.0%	99.0%	98.0%	98.0%	98.0%
Glare Reduction	93%	81%	72%	64%	55%	50%	34%
IRER**	54%	54%	54%	54%	54%	55%	54%

Data shown is the estimated performance of film applied to 1/4" (6mm) thick, 73% VLT automotive green glass. Data is for reference only.

*IRR - Percent of solar infrared energy in the 900 – 1,000 nm wavelength range that is rejected by the film. Measurement is made of film with liner alone (i.e. no glass).

**IRER - Percent of solar infrared energy that is rejected over the wavelength range from 780 – 2,500 nm. IRER takes into account the transmitted and absorbed IR energy that will be reradiated into a car. Data shown is for the performance of film applied to glass.
