

Ceramic Coating & Paint Correction Training Class

EPD offers a one (1) day hands-on installation training class designed to expose the trainee to the basics of paint correction and ceramic coating application.

Paint correction is usually a pre-requisite for ceramic coating application and refers to the restoration and removal of flaws (swirl marks, scratches, etc.) from a car's paint. We will demonstrate a two-stage correction process using a dual action machine. (Although paint correction can be taken to extreme levels, this class will help prepare you to repair mildly damaged paint to the point where 3M Ceramic Coating can be applied.)

After completing paint correction training, we will review ceramic coating application. We will cover vehicle preparation, tools, and application procedures for paint, plastics, and windshields. Comprehensive details regarding material composition and warranty will also be covered.

The price of the course is \$795.00 per person and includes:

- Start-up kit
- Lunch

Class begins at 8:30 AM and ends at 3:30 PM each day. (All times Eastern.)

Training is conducted at our training center which is located at:

Energy Products Distribution
